Digital Wallet

Digital Wallet is a fast and secure way to make purchases using unique payment information. Advanced security features keep your card details private from retailers, reduce your fraud risk, and put you in control.

Know the Facts: Common Questions

- **Can my card information get compromised?**
- **Can scammers steal my information by bringing a reader near me?**
- **If I lose my phone or it is stolen, could someone go on a spending spree?**

- Device security, such as Face ID, fingerprint, or passcode is required
- Your actual card details are never transmitted
- Temporary and unique payment information is useless to scammers
- Easy recovery by locking your card and disabling wallet remotely

How to Pay with Your Digital Wallet

Login to the Bank of Oak Ridge App, select Cards, and add your card to Digital Wallet.

Unlock with Face ID, fingerprint, or passcode and the device will transmit the signal.

Tap your phone against the reader until a green check mark appears on your screen.

Shopping online? Get the same security benefits when you pay with Digital Wallet. Look for the Apple Pay or Google Pay icons at checkout.
